

# PROPANE AUTOGAS

Serving your energy needs since 1968

# CONVERT TO PROPANE & TAKE CONTROL

*Traditionally, gasoline costs have held you hostage and emptied your wallet. These days, you have options. Now, there's propane:*

## ✓ **It's Feasible**

- Much cheaper than gasoline and consistently lower for years
- Convert your existing vehicle to bi-fuel (runs on gasoline or propane) for much less than buying a brand new factory-designed vehicle. Est. cost: \$5,000 - \$7,500
- Eliminates threat of employees stealing costly gasoline and wasting time at the convenience store

## ✓ **It's Clean**

- Propane is cleaner for the environment than gasoline – tell that to your customers!
- Environmental awareness and cleanliness great for public relations
- Cleaner burning = less maintenance

## ✓ **It's Convenient**

- Tank installed at your facility = easy refueling
- Gas reserve tank available should you run out of propane
- Comparable MPG with no loss of power

95% of  
propane in the  
United States  
produced in  
America! Tax  
available from  
Dept. of F

## Easy To Convert Any Vehicle To Bi-fuel!

## Easy To Pump From Your Own Refill Station!

# Combined Energy Services

*Family Owned and Operated Since 1968*

## PROPANE • FUEL OIL

- Online account access and bill payment
- Low monthly payment plans
- Dependable, automatic deliveries
- 24-hour repair service

Combined Energy Services remains dedicated to providing its customers with quality service and the best prices in the industry, while other companies are playing games with their customers' rates and delivery times, and not following through with their promises. We stand by our convenient payment and delivery programs, and our propane gas and fuel oil equipment and tank installations.

The bottom line is that we *deliver on our promises*. When you deal with Combined Energy Services, you are buying from a company you can trust.
